**Contractor: Transparencia en Servicios, S.A. de C.V.**  
**Country: Mexico**

Since 1994, Transparencia en Servicios (TS) has enjoyed plenty of success as a licensed ClearShield onsite applicator in Mexico.

TS, led by Director General Ivonne Campos Saldaña, has built up a strong reputation as a solution provider to renovate, protect and maintain glass with the ClearShield System. The company has completed a wide range of projects all over Mexico, from residential windows to curtain walling on large corporate office blocks.

One of TS' most impressive projects includes the renovation of two Banco Santander Serfin office buildings in Santa Fe and Querétaro. The buildings were awarded with the Intelligent Building Prize in 1994 ("Premio Nacional IMEI") by the Mexican Institute of Intelligent Building for their use of avant-garde technology. The bank was keen to uphold the image of perfection so when they had a problem keeping the glass clean, they turned to TS.

Despite being a small company, TS point out that no job is too big or difficult and is always happy to provide a quotation.

Ivonne says, "The ClearShield System, for me, is the greatest innovation in the world. I have had many clients since 1994 and they do not allow anyone else to care for their windows. My clients are really pleased with the System".

Ivonne is also quick to praise her team of fully-trained applicators: "I have a great team. My clients are always happy with the way they work. They refer to them as very careful workers and really nice people".

When building owners and facilities managers in Mexico experience problems keeping glass clean, Transparencia en Servicios is the first port of call.
